Still love the super seducer series , can't stop laughing while playing this . If you want ot have a good time , jump on this. Absolutely great. I have a GTX 980 and using NVIDIA NVENC decreases the rendering times quite a bit. Loving the dark colours on the UI as it's easier on the eyes and everything is suitable for me to make internet/YouTube/Twitter videos to entertain my friends.

When it's on sale for £31, it's such a good deal. Normal price is quite good too, especially in comparison to VEGAS PRO copies for £229 and up.. Fun illustrations, mood, and challenge!. Bắt đầu mấy ông Hikergames làm tôi bỏ ăn, bỏ uống, thức trắng mấy đêm liền vì game này.

10/10 đêm nay lại thức cà game tiếp. This game entertained me for the first 5 minutes, however, at the price of the game, it wasn't really worth the cost and is trumped by F2P games I have played online. Do NOT buy this game if you want value for money.. The game has so many bugs it's impossible to play, it also opens the game without an options menu and I have to play on my second monitor which is very uncomfortable. I tried, I really did. Twice. But I can not get into this game. What I'm sure was conceived as an innovative interface actually ends up being tedious and completely non-intuitive. It's a case of dragging and dropping everything onto everything else until something works, and while the game looks great and the voice acting for the part I played was well done, it just became too frustrating.

Smaller, more personal gripes; the story, at least at the beginning, struck me as a bit sketchy and certainly didn't endear me to the main character. Also, unless I missed something, there is no way to increase the painfully slow pace at which she walks. Lastly, the "How to Play" guide references a narrator who is accessed via the inventory, but unless he shows up later he was nowhere to be found in my game.

As an old fan of point-and-click adventures (actually, I started with text parser games and kinda miss them) I hate to give a negative review to one, but I don't see another option.. Really good asymmetric game. Won't spend 5 hours in a row on it, but 1 hour sessions will happen regularly I think.

NB; Works well with steamlink on a tv and 3 xbox controller.

Controller gameplay is really good and stressfull.

VR gameplay is very pleasant and a bit stressful (you know these bastards are hiding somewhere, but you don't know which android it is).

Haven't had a chance to play much (the fireballs tired me out haha), but so far the game is pretty cool.

The video/screenshots are accurate in showing you what you'll get. You can run around in the overworld and randomly encounter monsters to fight, pick up treasure, etc. There's also an arcade mode for continuously fighting and gaining experience. I'm much more interested in the overworld and RPG elements than just another wave shooter, so I'm looking forward to future development there. Looking off into the distance of the overworld showed some interesting stuff I'm excited to check out once my arms recover.

The menu and level up screen is pretty good. A book opens up in front of you and you navigate by selecting tabs at the top (it's shown several times in the video).

Didn't encounter any performance issues yet, so for the price it seems like a fair deal.. Had to ALT-F4 to write a negative review

wow those controls and shooting mechanics

had high hopes about it and was planning to support the dev team and buy a DLC if I liked it but no because that aiming and shooting system is pure♥♥♥♥♥. ummm.....wait this is from 2004? well remember in COD 4 that really sneaky sniper mission? remember how fun that was? well take away everything that made it fun and make it the entire game.

on a serious note, I don't mind old graphics, the voice acting is somewhat decent, however everything from sniper fire to graphics is so dated, like a 1999 PC game. the main issue I have with this game is that you can sneak around and avoid enemy fire, but there's no consequence for shooting the enemy with your sniper. sometimes they would just stand there even if they know where you are. so basically you just run to the checkpoint (which is long) then snipe everyone there. the game is pretty boring. got this from indie gala and this isn't worth any price.. This is a great game to have installed for off and on sessions. It's simple, yet challenging. It doesn't require you to put in long sessions. There's a lot of challenges and game modes to keep you occupied.. A top tier, OG Japanese eroge that combines strategy RPG and visual novel and each of these 2 sides has been masterfully crafted.. If you know da wae, you will play this game.

This is a good combination of pack racing, rally-X, rally raid, stadium events, snow, sand, forest, etc. multi-style arcade-ish racing without being ridiculously over the top. Easy to play with a controller, decent difficulty compared with most Milestone games, looks great at certain times of day, runs well. Fun to have Trois-Rivières in there, even though the GP circuit is not included.

The engine notes are weak, there is a lack of liveries and the AI can get a bit wonky at times, but it's a lot of fun overall. I had to turn off the announcer because he sounds like a bored ♥♥♥♥♥ spaz.. Really a great game. I play for the third time and have great fun.

Tipp: You have to build your FAI (Faith) at least to 5. Otherwise you can wait very very very long till you are healed...

. Oddly, this steam-ported version of FF vs the 3rd Reich works correctly compared to its prequel. A definite must-buy for comic book geeks and tactical RPG connoisseurs, and the amount of modding resources available is staggering..

incomprehensible happy sounds*. Love it. I've played Sierra's Pharaoh and Emperor 15 years ago and it introduced me to the city building genre. Was new to Steam and found out that this game exists. Never tried Caesar III though but I bought this game full price and it did not disappoint.
